FREQUENTLY ASKED QUESTIONS

The Evaluation EXPLAINED

When buying or selling a home, it's imperative to know what conditions are present.

1 IDENTIFY

Each evaluation we perform, is designed to identify the conditions in your home that can impact health or home value. Our highly skilled technicians report on 22 various points within the home extensively.

2 DOCUMENT

Our evaluations come with extensive reporting, designed to document the conditions currently present within the home, and to identify areas of vulnerability.

3 PHOTOGRAPH

Our photos provide you with a first hand perspective of the conditions within the home. These photos often help in the closing process and provide a visual documentation of the conditions present

4 REVIEW

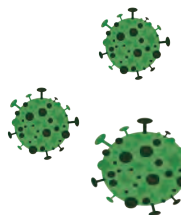

Our techs take the time to thoroughly review the info compiled during the evaluation process. If any additional letters or documentation are needed, we include these at no additional charge.

The Shore's Leading MOLD SPECIALISTS

Mold Treatments

Mold, being a living organism needs food and the proper environment to survive. Our treatments effectively kill and inhibit future mold growth. Backed with a 10 year, Transferrable warranty, our treatments have the best guarantee available on the Shore

Our other service offerings provide you with systems designed to prevent future growth and preserve the home for decades to come.

Financing Available

We offer various Financing Options to assist in funding your enhancement project. We offer 365 Days SAC, Multi-Year terms and More!

OUR PROCESS

EVALUATE

Our evaluations cover each facet of the home's crawlspace, basement, attic and exterior drainage. The evaluation allows us to identify negative conditions and plan an effective enhancement of the home.

CLEAN OUT & TREATMENT

Though each installation is different, the main starting point is a proper clean out, the removal of damaged insulation and the treatment of any mold, mildew or fungus within the home.

MOISTURE PROTECTION

No system is complete without proper protection from the conditions that can occur in your home's crawlspace, basement, or attic. We design our services to protect your family and home for years to come.

ENERGY SAVINGS

Once negative moisture conditions are addressed, we focus on closing the crawlspace off from the outside environment which assists in moisture management, while improving indoor air quality and energy savings.

ON-GOING MONITORING

We offer on-going monitoring as part of each Installation. To preserve the environment within the home, we perform evaluations strategically in differing seasons to monitor the success of each installation.
